We will discuss some lightweight ways to introduce students to [digital humanities](#) concepts in the classroom, and ways to construct assignments that do not require knowledge of the command line/programming.

Lightweight Vs Resource Intensive

- How do you define this?
 - Content and Context
- What is your goal?
 - Scope your goal
- What resources are available to you?
 - Collaboration
 - Documentation

Five things that we mean when we say digital humanities

- Humanistic examination of digital objects
- Digital scholarly communication
- Digital pedagogy
- Creation of digital archives and primary source materials
- Digital examination of Humanistic objects
 - [Libraries as Problem Shapers: some thoughts sparked by Brian Croxall \(five things that we mean when we say digital humanities\) by Brian Mathews](#)

Why is research so challenging for Students?

- 80% of undergraduates reported having overwhelming *difficulty getting started* on research assignments and determining the nature and scope of what was expected of them

- 43% of first year students said they *had trouble making sense of, and tying together*, all the information they had found

Stages of Planning for a DH Assignment

- Phase 1: Determining Scope
- Phase 2: Planning
- Phase 3: Execution
- Phase 4: Assessment/Reflection

Goal: Students create digital exhibit

Tool: Omeka

What is Omeka?

What is Omeka?

[Omeka](#) is a web publishing platform and a content management system (CMS), developed by the Center for History and New Media ([CHNM](#)) at George Mason University. Omeka was developed specifically for scholarly content, with particular emphasis on digital collections and exhibits. ...Omeka has been used by many academic and cultural institutions for its built-in features for cataloging and presenting digital collections. Developing content in Omeka is complemented by an extensive list of descriptive metadata fields that conforms to Dublin Core, a standard used by libraries, museums and archives ... This additional layer helps to establish proper source attribution, standards for description and organization of digital resources—all important aspects of scholarly work in classroom settings but often overlooked in general blogging platforms.

Digital Projects Librarian

Phase 1: Determining Scope

- Determine pedagogical goals, which will dictate your assignment goals.
- Determine the amount of class time you want to allot to assignment.
- Determine what resources are available.
 - Human and technical

Phase 2: Planning

- Figure out all the logistics:
 - What kind of data are your students working with?
 - (numerical, textual, spatial, temporal, network relationships, etc.)
 - What do you want them to do with the data?
 - How are they going to analyze/manipulate it?
 - How do you want them to present/publish the analysis?

What are DH tools?

- What Digital Humanists mean by 'Tools' is extremely loose and inclusive: in essence, it means any kind of application or software that helps you get the job done, whether gathering, processing, or presenting your research" - [matthew milner](#)
- [Bamboo DiRT](#)
- [Digital Humanities Tools](#)
- [DH Tools](#)

How do you choose which DH tool?

- What kind of data are you analyzing and what kind of output do you want to create?
 - Text
 - Sound/Speech
 - Spatial/ Mapping
 - Temporal/Timelines
 - Networks
 - Digital exhibits/collections
 - Social annotations
- How much does the tool cost?
 - Consider in terms of labor/time as well as money

Bamboo DiRT

I NEED A DIGITAL RESEARCH TOOL TO...

Analyze data

Interpret data

Annotate

Model data

Archive data

Analyze networks between my data

Capture information

Organize data

Clean up data

Preserve data

Collaborate

Program

Comment

Publish

Communicate

Record audio/video

Analyze the content of my data

Analyze relationships between pieces of data

Contextualize data

Share

Convert files

Analyze the geographical aspect of my data

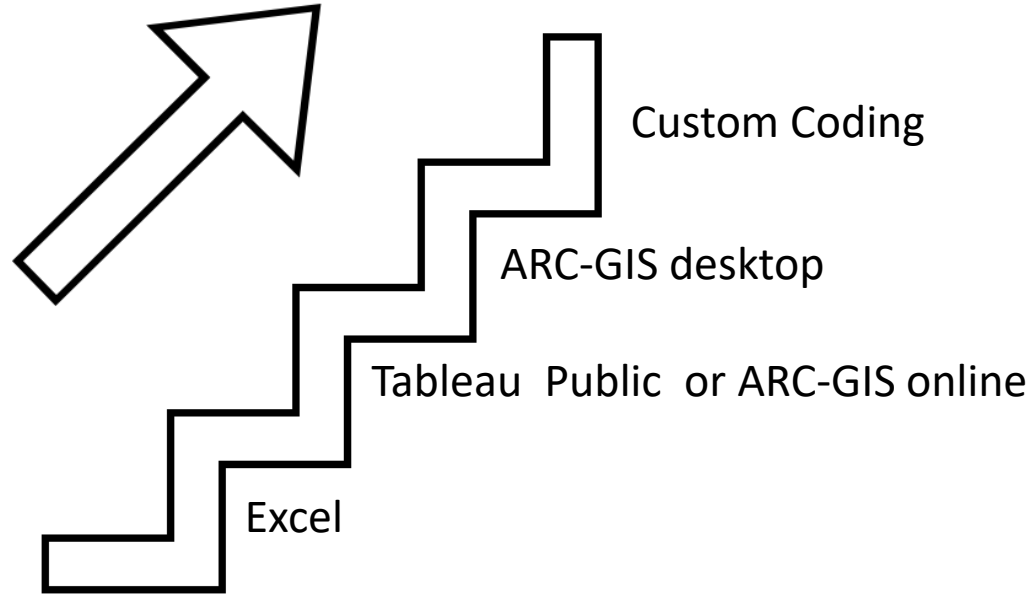

Create

Store data

Crowdsource data enrichment/analysis

Analyze the structure of my data

How robust and complex a tool do you need?

What are the...

Benefits of Tool	Limiting Factors of Tool
<ol style="list-style-type: none">1. Technical Benefits2. Learning Benefits	<ol style="list-style-type: none">1. Technical Limits2. Learning Limitations or Costs

Assignment Storyboarding

Student Expe r i e n c e

Group Work

- Have students done group work before?
 - Project Charter or other agreement

Phase 3: Execution

Find Relevant Data

Clean and Import Data

Learn Software

Design Visualization

Conduct Literature Review

Synthesize and Write Paper

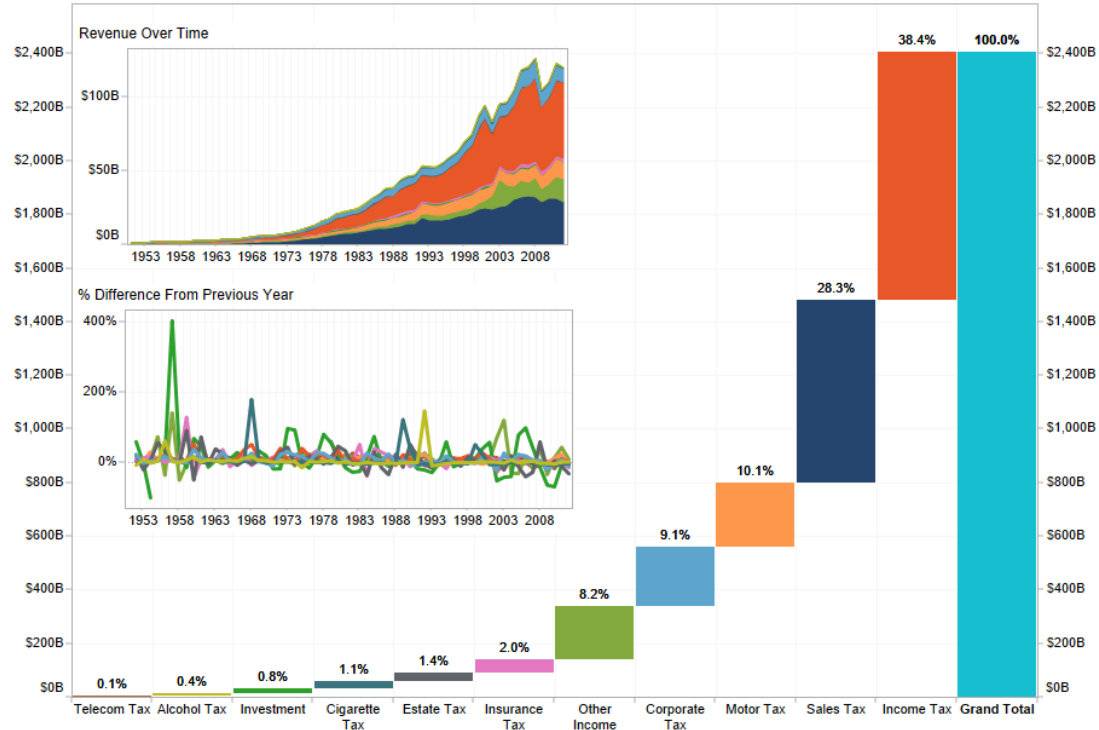

Goal: Student create a visualization

Tool: Tableau

California Revenue Sources

Select Date: 1951 to 2012

How [Tool] Works

Take Data*

Import data
into [Tool]

Perform Data
Analysis

Publish [as
embeddable
media]

Create Output
[ex. Interactive Data
Visualizations]

*This assumes data already exists and is clean (or tidy) enough for use

Synthesize and Write Paper

Homework/Peer Workshop/
Office Hour Meetings

Phase 4: Assessment/Reflection

How to improve Assignments

- Benefits/Costs
- Is the learning outcome worth the effort of the instructor and student? (Effectiveness)
- Are there ways that we can maximize the learning value and/or minimize the amount of time or administrative costs? (Efficiency)
